

STARRY
NIGHT
SENSORY BAG

K-2

## Why should you do this activity?

This is a great way to engage your young child's senses since their little brains and skills are still developing. It allows them to tangibly interact with the world around them in a safe and simulative manner.

Take your hair gel and empty the contents of it into the gallon plastic bag

After step 1 is completed, shake in your star confetti. (I used about 1/3 of the bag)

Before sealing your bag, lay it flat and squeeze out as much air as possible.

To make the stars really shine, tape your bag down to a piece of black poster board and cut to the size of the gallon bag.

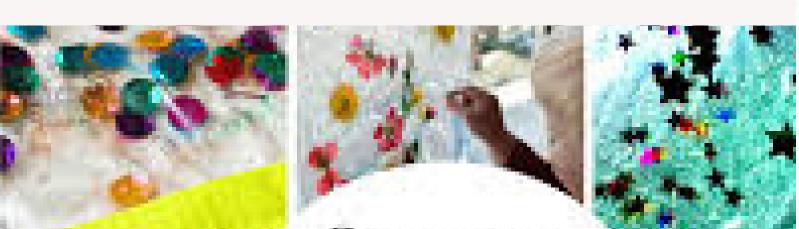

## Starry Night Sensory Bag

• The Starry Night Sensory
Bag is great motor skill
challenge just to move the
stars around in the bag.
